

Software Engineering Intern (Remote in Arizona)

Rocket Lawyer

Full Job Description:

Rocket Lawyer provides online legal services to help users meet the legal needs of their families and business. They are seeking a software engineering intern to work in a fast-paced environment, collaborating with an agile team to contribute to development tasks, bug fixes, and testing.

Collaborate with your team during backlog grooming sessions and sprint planning to help prioritize and shape work.

Contribute to tasks and bug fixes during each sprint, ensuring a continuous flow of work.

Engage with team members to ensure shared understanding, alignment, and open communication.

Write and execute tests to ensure your solutions meet all requirements and acceptance criteria.

Submit pull requests for peer review, actively incorporating feedback to improve your work.

Maintain up-to-date ticket status in JIRA and share progress during daily standups.

Actively participate in sprint demos and retrospectives to share experiences, feedback, and insights.
